 C +1 614 747 2549

Bharat is a registered architect in the State of Ohio with over 24 years of work experience. He has been a firm owner, production architect in a large corporate firm and a project manager in a mid-sized firm. His range of expertise runs from multi-family developments to large multi million dollar commercial buildings. Bharat's skills allow him to successfully navigate a project from the early conceptual stages through to the end of construction.

In particular, he has developed the skill of bridging the often divergent realms of design concepts and their translation into construction documents. Bharat can work with equal ease amongst designers and detailers. His proficiency in software follows the same strain from graphics and visualization to construction documents and administration.

In his role as COO, Bharat is in charge of overall operations and strategic planning for the company. Additionally, he is also design lead and supervisor of the firm's project managers and architects to ensure delivery of a high standard of design and construction documents to our clients.
